Cautions

- Please use relays in the conditions described in the specification. Otherwise product performance will not be guaranteed.
- \blacksquare Please add surge protection in parallel if an inductive load (L/R>1ms) is applied.
- Contact resistance may increases if a relay is operating without a load.
- Please connect the terminals correctly. Any wrong connection may cause circuit damage such as malfunction, overheat, and fire.
- Screwing-tightening condition: A) M5 Screw: 3Nm~4Nm (Tightening torque for fixing relay body)
 B) M6 Screw: 6Nm~8Nm (Tightening torque for contact terminal) C) M8 Screw: 10Nm~12Nm (Tightening torque for external contact terminal)
- Use the suitable wires or busbars according to the current. Carrying current: 300Amps: diameter of 185mm² (min.).
- Standard operation condition:temperature-40°C~85°C,humidity 5%~85%R.H..
- Correct installation of the connector:the coil circuit is polarized.
- If the relay is dropped, it should not be used again.
